

GRANEDA Dynamic 4.2 is available

These are the most important new features:

- Installation also in Windows 7 with Microsoft Project 2010 connection (64-bit compatible)
- Faster transfer of projects from Microsoft Project
- Project selections and multi-project processing when importing XER files from Primavera
- Wizard to import CSV files and macro to transfer project data directly from Microsoft Excel
- New bar shapes and more clearly-arranged link routing in Gantt charts
- Structured annotation field in the diagram border area (according to ISO 7200)

Download the new version and the flyer "New in Version 4.2" with detailed information about every new feature on www.netronic.com.

GRANEDA Dynamic 4.2 supports Primavera 8

The GRANEDA Dynamic 4.2 Interface for Primavera .XER files supports Primavera Version 8 as well with Project selections and multi-project processing.

GRANEDA Dynamic Consistently Receives High Ratings

Again and again, our support team gets positive user feedback:

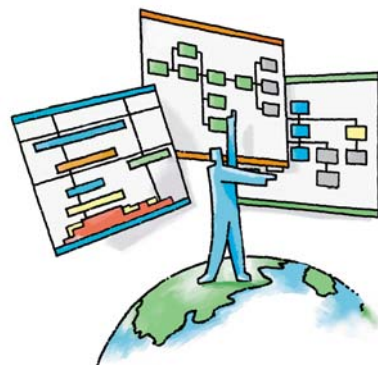

„GRANEDA Dynamic 4.2 runs like clockwork :-) I would like to order the upgrade now! “

"My experience with this software is very positive. I mainly used it to create work breakdown structures. Creating these structures from Microsoft Project went really very fast. The options for layout etc. were also very convincing. About the support: I had a question concerning the coding of work breakdown structures and contacted support. I was helped immediately and in a very competent way", says Markus Streich, University of Biberach, study course "Project Management".

A Note to Our Customers and Readers

After more than 35 years, Dr. Andreas Schmitz hands over the company's management to Dr. Martin Karlowitsch. 40-year-old Dr. Karlowitsch studied Business Management at the HHU Düsseldorf and wrote his doctoral thesis on performance measurement. After having worked for the German Parsytec AG in diverse management functions such as investor relations, sales operations and global marketing he most recently was responsible for marketing in EMEA at the enterprise software vendor Sybase, an SAP company.

With the GRANEDA software products, Dr. Schmitz has made the NETRONIC team a worldwide successful expert for project charts. The compliance with certain standards (DIN) in the development of Gantt, net and tree charts ensures that GRANEDA Dynamic is until now used in the professional project management. Dr. Karlowitsch will continue working with the experienced and capable team in our customer's interest as well as secure and expand NETRONIC's market position.

Kaleidoscope of new Customers and Projects using GRANEDA Dynamic

	<p>Vale Inco in Canada runs ore production mines in 21 countries. 12,000 employees work in the extraction of iron, nickel, aluminium, manganese, and copper.</p> <p>GRANEDA Dynamic is used there as graphical supplement to Primavera 6.</p> <p>www.valeinco.com</p>
<p>The Let's Print Holding AG in Austria is the holding of the operative companies that are acting in the market under the brand name LEYKAM Let's Print www.leykamletsprint.com. At the three production locations Wien, Graz and Hoče/Maribor (Slovenia) ultra-modern reel-fed offset printing machines produce a total output of more than 30 m DIN A 4 pages per hour!</p> <p>GRANEDA Dynamic is used for displaying tree diagrams.</p> <p>www.letsprintholding.com</p>	
	<p>The Deutsche Börse AG operates the Frankfurt Stock Exchange. It is one of the biggest trading centres for securities worldwide. With a share of sales of more than 90 percent it is one of the biggest of the seven stock exchanges in Germany.</p> <p>GRANEDA Dynamic is used to automatically create networking diagrams from raw data in batch operating.</p> <p>www.deutsche-boerse.com</p>
